

Note: Answer all questions where applicable and include the detailed information of your findings in the content of the written report. Follow the format outlined in the front of the IICRC Reference Guide for Inspection of Textile Floorcoverings. Include labeled photographs and drawings with report.

Hint: You can fill out your business information at the bottom of each page, then save the form with a different name, then use that saved form for your reports. To reuse this as a template, save it with a different name again, for example by the commissioning agent and claimant's names. The benefit is that the business information is always filled out when you open the form.

The page called "Narrative Form" is to be used for the body of the report. The space will grow to a certain extent as the information is entered, but there will be a limit to how many words the space will hold. You will come to a point where the words will go over to the next page, but the form will become distorted. We recommend saving that page and starting a fresh page.

If you have any questions about the form, contact [inspecttacchair@iicrc.org](mailto:inspecttacchair@iicrc.org)
